

AHMAD ROBBI RODHIYAN RIFANTO

IT DEVELOPMENT LEAD | ENTERPRISE APPLICATION LEAD | SENIOR FULL-STACK DEVELOPER

Sidoarjo, East Java, Indonesia | +62 822-3290-0440 | robbirodhiyan@gmail.com | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Enterprise Application and IT Development Lead with 2+ years of experience leading a 15-member IT team and delivering 10+ business-critical systems for manufacturing operations. Portfolio spans HRIS, production and QC reporting, KPI and OEE, SAP data integration and cloning, ERP, sales order management, finance and procurement reporting, workflow automation, WhatsApp gateway, and payment integration. Built SAP-integrated data pipelines processing 10,000+ transaction records per day, reduced production reporting from 8 hours to 1 minute, and improved database reporting performance by 40%. Combines hands-on full-stack engineering with solution architecture, stakeholder management, cloud infrastructure, and end-to-end delivery.

15-MEMBER TEAM | 10+ ENTERPRISE SYSTEMS | 10,000+ SAP RECORDS/DAY | REPORTING: 8 HOURS TO 1 MINUTE

CORE COMPETENCIES

Technical Leadership & Team Management | Enterprise Application Architecture | SAP Integration & Data Synchronization
System Design & API-First Development | Business Process Automation | Database Performance & Production Reliability
Project Planning & Delivery | Requirements Engineering | QA, UAT, Deployment & Stakeholder Management

PROFESSIONAL EXPERIENCE

PT Multi Spunindo Jaya Tbk

Nov 2024 - Present

Foreman IT Programmer / IT Development Lead

- Lead a 15-member IT team in designing, building, and maintaining 10+ enterprise applications across HR, Production, Quality Control, Purchasing, Finance, Sales, and operational support functions.
- Translate business priorities into technical roadmaps, allocate development work, mentor team members, conduct code reviews, and maintain delivery standards across concurrent projects.
- Own solution architecture, project prioritization, coding standards, QA/UAT coordination, release planning, technical documentation, and post-deployment support for business-critical systems.
- Designed SAP-integrated REST API and data-cloning pipelines that process 10,000+ transaction records per day using scheduled synchronization, background jobs, batching, retry/checkpoint controls, and Redis caching.
- Delivered production, QC, KPI, Yield/OEE, and reporting platforms that reduced production reporting from 8 hours to 1 minute and improved database reporting performance by 40% through indexing, query tuning, and backend optimization.
- Developed HRIS workflows covering e-leave, permissions, attendance, overtime, and payroll, as well as ERP, sales order, procurement, financial reporting, payment, and approval workflows.
- Built automation and communication solutions including a WhatsApp gateway, real-time operational notifications, scheduled processes, and cross-system integrations that reduced repetitive manual work.
- Partner with department leaders for requirement gathering, process mapping, risk identification, user acceptance testing, rollout planning, and continuous improvement.
- Manage AWS EC2, RDS, ElastiCache/Redis, Linux servers, Apache, SSL, domain configuration, production deployment, system monitoring, and incident troubleshooting.

PT Weza Punya Cerita

Oct 2023 - Nov 2024

Full-Stack Developer

- Developed web and mobile applications using Laravel and React Native, covering backend services, REST APIs, database design, and user-facing features.
- Designed scalable application structures and secure integrations while improving UI/UX, maintainability, and application performance.
- Collaborated with stakeholders to convert product requirements into tested features and production-ready releases.

Manufacturing Intelligence & Quality Systems

- Built production reporting, QC result reporting, Certificate of Analysis, operational KPI, Yield, and OEE dashboards for cross-department manufacturing visibility.
- Automated calculations and reporting workflows, supported 100 internal users, and reduced production reporting from 8 hours to 1 minute.

SAP Integration & Enterprise Data Platform

- Developed REST API integrations and SAP table-cloning pipelines for high-volume operational and reporting data across enterprise applications.
- Implemented scheduled synchronization, queue-based processing, batching, checkpoint/retry handling, and optimized datasets for near real-time reporting.

HRIS & Workforce Operations

- Delivered integrated e-leave, employee permission, attendance, overtime, and payroll modules with role-based approvals and centralized HR reporting.
- Digitized employee administration and approval workflows to improve traceability, consistency, and access to workforce information.

ERP, Finance, Procurement & Commercial Operations

- Built company transaction recording, purchase and financial reporting, sales order creation, procurement monitoring, and approval workflow applications.
- Integrated payment gateway and SAP-sourced data to reduce manual entry and improve transaction monitoring and reporting accuracy.

Automation, Messaging & Internal Services

- Developed a WhatsApp gateway, real-time operational notifications, scheduled automation, and cross-system integrations for internal business processes.
- Connected departments through automated alerts and supporting services that reduced repetitive administrative work and accelerated follow-up.

TECHNICAL SKILLS

Architecture & Delivery: Enterprise system design, API-first architecture, modular application design, asynchronous jobs and queues, caching, technical roadmap, code review, QA/UAT, release management

Backend & Integration: PHP, Laravel, REST API, Node.js, SAP integration, ABAP, webhooks, WhatsApp API/gateway, payment gateway integration, Rocket.Chat

Frontend & Mobile: JavaScript, React, Next.js, React Native, Tailwind CSS, Bootstrap, responsive enterprise dashboards

Data & Performance: MySQL, PostgreSQL, Oracle, MongoDB, SQL optimization, indexing, Redis, data synchronization, reporting pipelines, ETL-style processing

Cloud & DevOps: AWS EC2, RDS, ElastiCache, Linux server administration, Apache, SSL, domain management, Git, GitLab, GitHub, production deployment and troubleshooting

Professional Development Focus: TypeScript, Docker, CI/CD, Kubernetes fundamentals, Terraform, observability, event-driven architecture, automated testing, and AI/LLM application integration

EDUCATION

Telkom University Surabaya

2020 - 2024

Bachelor of Information Systems | GPA 3.76/4.00 | Cum Laude

AWARDS, TRAINING & LEADERSHIP

- NETRIS App - Registered Intellectual Property, Ministry of Law and Human Rights of Indonesia, Registration No. EC002023101498.
- Finalist, Young Innovator Competition 2.0 (YouthConnect), BBPKK, 2024.
- Training: SAP HR050 and SAP SCM100 - PT Harfan Tri Megah (EDUGATE); Frontend Developer Bootcamp - Inosoft.
- Leadership: Head of HR Division, Entrepreneur Community (2020-2024); Project Leader, PKM-KC Team (2023); Chair, Business Plan Competition.
